

Hero Max 300 Pro

SKU SH2820831-300-Pro

PRICE £965

FEATURES

- Improves 4G, 5G signal and voice calls, SMS on EE, O2, Vodafone, Three, and other UK networks, with full 5G coverage support
- Universal solution for both rural and urban areas, including semi-rural and low-coverage locations
- Delivers clearer calls and more stable 4G, 5G mobile data indoors

ABOUT

Reliable signal starts at the source, and Signal Hero Max 300 is engineered to deliver stable mobile connectivity throughout your home or workplace. Missed calls, dropped connections, and slow data no longer need to be part of daily life in rural, semi-urban, urban, or low-coverage areas across the UK. **The system performs most effectively where outdoor signal strength ranges between 1-2 bars**, capturing and amplifying usable signal that already exists outside.

Designed as a universal solution, Signal Hero Max 300 supports all major UK mobile networks, providing reliable **4G voice and data along with strong 5G coverage capacity where available**. Its advanced architecture efficiently handles modern 5G frequencies for improved indoor consistency.

An external antenna collects the outdoor signal and transfers it via professional-grade cabling to the booster unit. The enhanced signal is then redistributed indoors through a panel antenna, delivering clearer calls, **stronger signal bars, and more stable 4G and 5G data**.

With wide coverage range and the ability to operate with multiple nearby cell masts, it is ideal for offices, medium-sized homes, and multi-user environments. **No subscriptions or ongoing fees. Includes a 60-day money-back guarantee and 3-year warranty.**

INSTANT SIGNAL BOOST

UP TO +72db GAIN

SUPPORTS UP TO 30 USERS CONNECTIONS

FAST NETWORK & DATA SPEED

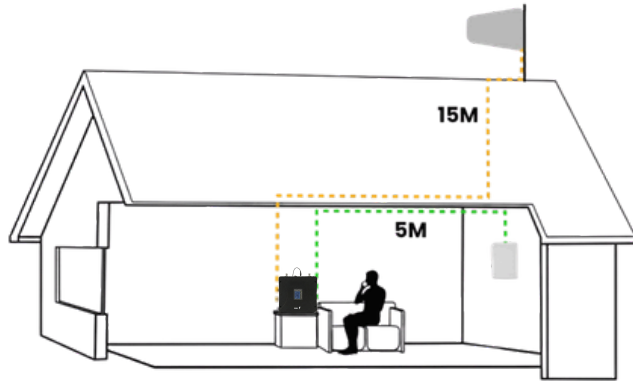

KIT INCLUDES

SPECIFICATIONS

MODEL NUMBER	SSH208317-300-Pro
FREQUENCIES	BAND 28 20, 8, 3 and 1 800 Mhz / 900 MHz / 1800 MHz / 2100 MHz / 2600MHz
MAX GAIN	72 dB ±2
IMPEDANCE	50 Ohm
POWER SUPPLY	AC 100-240V
CONNECTORS	N-FEMALE
BOOSTER DIMENSIONS	22 x 14.5 x 5.5 cm
BOOSTER WEIGHT	<4Kkg

INSTALLATION

The signal is received from the outdoor cell towers and transmitted through the cable to the booster box.

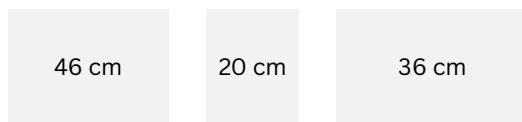

The booster box receives the signal from the outdoor aerial and retransmits it to the indoor antenna via a cable.

The panel antenna mounted on the wall receives the signal and retransmits a clean, high-quality phone signal throughout the property.
