

Hero Max 600 Pro

SKU SH208317-600-Pro

PRICE £1245

FEATURES

- Improves 4G, 5G signal and voice calls, SMS on EE, O2, Vodafone, Three, and other UK networks, with full 5G coverage support
- Universal solution for both rural and urban areas, including semi-rural and low-coverage locations
- Delivers clearer calls and more stable 4G, 5G mobile data indoors

ABOUT

Reliable signal starts at the source, and Signal Hero Max 600 is engineered to deliver stable mobile connectivity across buildings up to 600 sqm, at home or at work. Missed calls, dropped connections, and slow data no longer need to be part of daily life in rural, semi-urban, urban, or low-coverage areas across the UK. **The system performs best where outdoor signal strength ranges between 1-2 bars, capturing and amplifying usable signal already available outside.** Designed as a universal solution, Signal Hero Max 600 supports all major UK mobile networks, delivering **reliable 4G voice and data along with strong 5G coverage where available.** Its advanced architecture efficiently handles modern 5G frequencies for consistent indoor performance.

An external antenna captures the outdoor signal and transfers it via professional-grade cabling to the booster. The enhanced signal is redistributed indoors through a panel antenna, delivering clearer calls, stronger signal bars, and stable 4G and 5G data across up to 600 sqm.

With wide coverage and the ability to operate with multiple nearby cell masts, it is ideal for offices, large homes, and multi-user environments. **No subscriptions or ongoing fees. Includes a 60-day money-back guarantee and 3-year warranty.**

 INSTANT SIGNAL BOOST

 UP TO +72db GAIN

 SUPPORTS UP TO 30 USERS CONNECTIONS

 FAST NETWORK & DATA SPEED

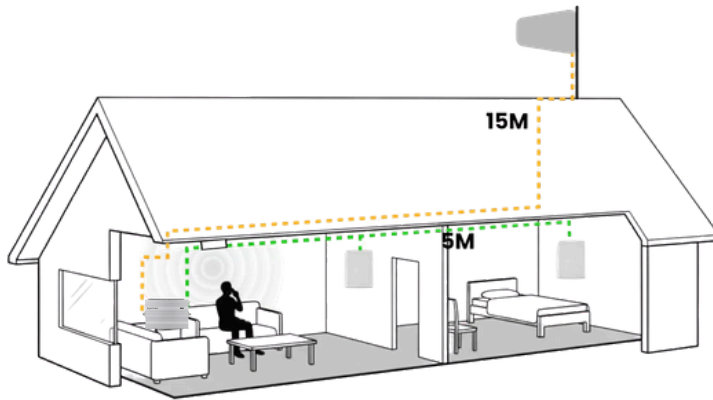

KIT INCLUDES

SPECIFICATIONS

MODEL NUMBER	SH208317-600-Pro
FREQUENCIES	BAND 28 20, 8, 3 and 1 700 Mhz / 800 MHz / 900 MHz / 1800 MHz / 2100MHz
MAX GAIN	72 dB ±2
IMPEDANCE	50 Ohm
POWER SUPPLY	AC 100-240V
CONNECTORS	N-FEMALE
BOOSTER DIMENSIONS	22 x 14.5 x 5.5 cm
BOOSTER WEIGHT	<5Kkg

INSTALLATION

The signal is received from the outdoor cell towers and transmitted through the cable to the booster box.

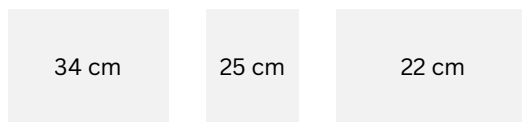

The booster box receives the signal from the outdoor aerial and retransmits it to the indoor antenna via a cable.

The panel antenna mounted on the wall receives the signal and retransmits a clean, high-quality phone signal throughout the property.
