

Hero Max 1000

SKU SH208317-1000

PRICE £1750

FEATURES

- Improves 4G, 5G signal and voice calls, SMS on EE, O2, Vodafone, Three, and other UK networks, with full 5G coverage support
- Universal solution for both rural and urban areas, including semi-rural and low-coverage locations
- Delivers clearer calls and more stable 4G, 5G mobile data indoors

ABOUT

Reliable signal starts at the source, and Signal Hero Max 1000 is engineered to deliver stable mobile connectivity across buildings up to 1000 sqm, at home or at work. Missed calls, dropped connections, and slow data no longer need to be part of daily life in rural, semi-urban, urban, or low-coverage areas across the UK.

Designed as a universal solution, Signal Hero Max 0100 supports all major UK mobile networks, delivering **reliable 4G voice and data along with strong 5G coverage where available**. Its advanced architecture efficiently handles modern 5G frequencies for consistent indoor performance.

An external antenna captures the outdoor signal and transfers it via professional-grade cabling to the booster. The enhanced signal is redistributed indoors through a panel antenna, delivering clearer calls, stronger signal bars, and stable 4G and 5G data across up to 1000 sqm.

With wide coverage and the ability to operate with multiple nearby cell masts, it is ideal for offices, large homes, and multi-user environments. **No subscriptions or ongoing fees. Includes a 60-day money-back guarantee and 3-year warranty.**

INSTANT SIGNAL BOOST

UP TO +70db GAIN

SUPPORTS UP TO 30 USERS CONNECTIONS

FAST NETWORK & DATA SPEED

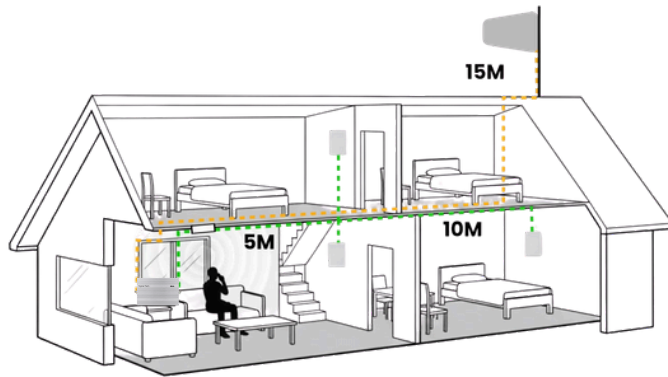

KIT INCLUDES

SPECIFICATIONS

MODEL NUMBER	SH208317-1000-Pro
FREQUENCIES	BAND 20, 8, 3, 1 and 7 800 Mhz / 900 MHz / 1800 MHz / 2100 MHz / 2600MHz
MAX GAIN	75 dB ±2
IMPEDANCE	50 Ohm
POWER SUPPLY	AC 100-240V
CONNECTORS	N-FEMALE
BOOSTER DIMENSIONS	44 x 34x 13 cm
BOOSTER WEIGHT	<10Kkg

INSTALLATION

The signal is received from the outdoor cell towers and transmitted through the cable to the booster box.

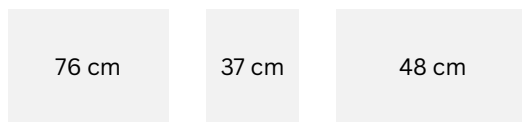

The booster box receives the signal from the outdoor aerial and retransmits it to the indoor antenna via a cable.

The panel antenna mounted on the wall receives the signal and retransmits a clean, high-quality phone signal throughout the property.
