

Hero Ultra 1000

SKU SH20831-1000

PRICE £965

FEATURES

- Improves 4G signal and voice calls on EE, O2, Vodafone, Three, and most UK networks, with support for advanced level of 5G coverage
- Universal solution for both rural and urban areas, including semi-rural and low-coverage locations
- Delivers clearer calls and more stable 4G, 5G mobile data indoors

ABOUT

Reliable signal starts at the source, and Signal Hero Ultra is designed to bring strong, stable mobile connectivity into your home or workplace. Missed calls, dropped connections, and slow data speeds no longer need to be part of daily life in rural, semi-urban, or low-coverage areas across the UK.

Signal Hero Ultra supports all major UK mobile networks, delivering reliable 4G voice and data along with advanced 5G coverage where available. An external antenna captures outdoor signal, transfers it through professional-grade cabling to the booster, and redistributes the enhanced signal indoors via panel antennas, providing clearer calls and consistent mobile data across the property.

With three indoor antenna connections, the system is suitable for spaces up to approximately 1,000 sqm, making it ideal for offices, large homes, warehouses, and multi-room commercial buildings. Its strong connection range and ability to utilise multiple nearby cell masts ensure stable performance even when multiple users are connected simultaneously.

Installation follows a proven layout widely used across UK properties. Our UK-based support team is available before and after purchase, with no subscriptions or ongoing fees. **Signal Hero Ultra includes a 60-day money-back guarantee and a 3-year warranty for peace of mind.**

INSTANT SIGNAL BOOST

UP TO +70db GAIN

SUPPORTS UP TO 25 USERS CONNECTIONS

FAST NETWORK & DATA SPEED

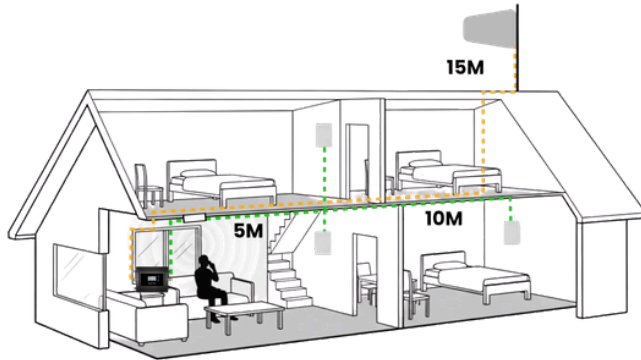

KIT INCLUDES

SPECIFICATIONS

MODEL NUMBER	SH20831-1000
FREQUENCIES	BAND 20, 8, 3 and 1 800 MHz / 900 MHz / 1800 MHz / 2100MHz
MAX GAIN	70 dB ±2
IMPEDANCE	50 Ohm
POWER SUPPLY	AC 100-240V
CONNECTORS	N-FEMALE
BOOSTER DIMENSIONS	22 x 14.5 x 5.5 cm
BOOSTER WEIGHT	<0.9Kkg

INSTALLATION

1

The signal is received from the outdoor cell towers and transmitted through the cable to the booster box.

2

The booster box receives the signal from the outdoor aerial and retransmits it to the indoor antenna via a cable.

3

The panel antenna mounted on the wall receives the signal and retransmits a clean, high-quality phone signal throughout the property.
