

Hero Core 600 Pro

SKU SH203-600-Pro

PRICE £359/ £439

FEATURES

- Improves 4G signal and voice calls on EE, O2, Vodafone, Three, and most UK networks
- Designed for rural, semi-rural, and low-coverage locations with limited outdoor signal
- Supports the two main UK 4G frequency bands used by all major mobile providers
- Delivers clearer calls and more stable 4G mobile data indoors

ABOUT

Reliable signal starts outside – and Signal Hero Core is designed to bring it properly indoors. Missed calls, dropped connections and unstable data don't have to be part of daily life in rural, semi-urban or low-coverage areas, **even where outdoor signal is limited to just 1-2 bars**. The system is built to cover properties up to 600 sqm, making it suitable for medium to large homes and buildings.

As a universal solution, Signal Hero Core supports all major mobile networks, delivering stable 4G data and dependable voice calls. It captures available outdoor signal from the nearest cell tower using a dedicated antenna, transfers it through professional-grade cabling to the booster unit, and redistributes the strengthened signal indoors via a panel antenna. This setup is ideal where usable outdoor signal exists but indoor reception is weak across larger floor areas.

It works effectively for everyday mobile use and 4G SIM routers, helping stabilise calls and mobile data throughout the property.

Installation follows a proven layout used in residential and rural environments. Our UK-based support team is available before and after purchase.

No subscriptions or ongoing fees. Includes a **60-day money-back guarantee and 3-year warranty**.

INSTANT SIGNAL BOOST

UP TO +72db GAIN

SUPPORTS UP TO 30 USERS CONNECTIONS

FAST NETWORK & DATA SPEED

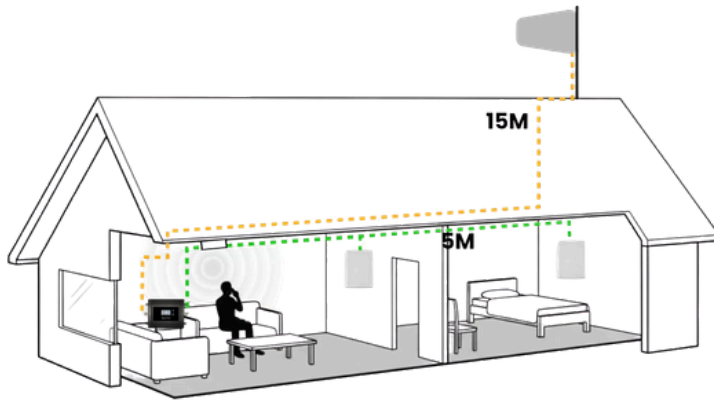

KIT INCLUDES

SPECIFICATIONS

MODEL NUMBER	SH203-600-Pro
FREQUENCIES	BAND 20 AND 3 800 MHz / 1800 MHz
MAX GAIN	72 dB ±2
IMPEDANCE	50 Ohm
POWER SUPPLY	AC 100-240V
CONNECTORS	N-FEMALE
BOOSTER DIMENSIONS	20.5 x 12.5 x 4.8 cm
BOOSTER WEIGHT	<0.6Kkg

INSTALLATION

The signal is received from the outdoor cell towers and transmitted through the cable to the booster box.

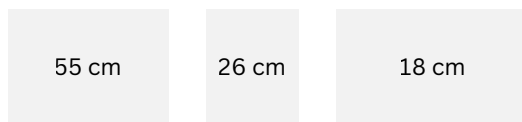

The booster box receives the signal from the outdoor aerial and retransmits it to the indoor antenna via a cable.

The panel antenna mounted on the wall receives the signal and retransmits a clean, high-quality phone signal throughout the property.
