

Hero Ultra 300

SKU SH20831-300

PRICE £565

FEATURES

- Improves 4G signal and voice calls on EE, O2, Vodafone, Three, and most UK networks, with support for advanced level of 5G coverage
- Universal solution for both rural and urban areas, including semi-rural and low-coverage locations
- Delivers clearer calls and more stable 4G, 5G mobile data indoors

ABOUT

Reliable signal starts at the source, and Signal Hero Ultra is built to bring strong mobile connectivity into your home or workplace. Missed calls, dropped connections and unstable data no longer need to be part of daily life in rural, semi-urban or low-coverage areas across the UK.

Designed as a universal solution, Signal Hero Ultra supports all major UK mobile networks, **delivering stable 4G voice and data along with advanced 5G coverage** where available. An external antenna captures available outdoor signal, transfers it through professional-grade cabling to the booster, and redistributes the improved signal indoors via a panel antenna, resulting in clearer calls and more consistent mobile data throughout the property.

Thanks to its high connection range and ability to work with multiple nearby cell masts, this system is an ideal choice for offices, larger homes, properties using multiple mobile providers, or locations where many network users need reliable service at the same time.

Installation follows a proven, straightforward layout widely used in UK homes and businesses. Our UK-based support team is available before and after purchase, and there are no subscriptions or ongoing fees. Signal Hero Ultra **includes a 60-day money-back guarantee and a 3-year warranty** for added confidence.

 INSTANT SIGNAL BOOST

 UP TO +70db GAIN

 SUPPORTS UP TO 25 USERS CONNECTIONS

 FAST NETWORK & DATA SPEED

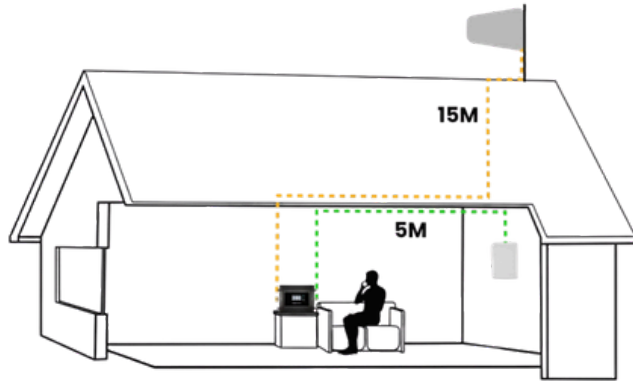

KIT INCLUDES

SPECIFICATIONS

MODEL NUMBER	SH20831-300
FREQUENCIES	BAND 20, 8, 3 and 1 800 MHz / 900 MHz / 1800 MHz / 2100MHz
MAX GAIN	70 dB ±2
IMPEDANCE	50 Ohm
POWER SUPPLY	AC 100-240V
CONNECTORS	N-FEMALE
BOOSTER DIMENSIONS	22 x 14.5 x 5.5 cm
BOOSTER WEIGHT	<0.9Kkg

INSTALLATION

1

The signal is received from the outdoor cell towers and transmitted through the cable to the booster box.

2

The booster box receives the signal from the outdoor aerial and retransmits it to the indoor antenna via a cable.

3

The panel antenna mounted on the wall receives the signal and retransmits a clean, high-quality phone signal throughout the property.
